Allowable Subject Matter

Claims 1-28 are allowed.

The following is an examiner's statement of reasons for allowance: with respect to claims 1,14 and 20 the prior art of record does not teach dissociating gas for article treatment by forming a plasma and using a constriction of the plasma from one chamber to another to increase the power density of the plasma, in combination with controlling the expansion of the formed plasma back through the source. With respect to claim 8 the use of first and second chambers with constrictions for the dissociated plasmas to increase the densities and supplying the same to a third chamber for article treatment, is not set forth in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
